To whom it may concern,

Please do this country a big favor and split them up, take them apart...do what ever you have to do to make them play by the same rules everyone else has to if you can't put them out of business. We're all so tired of watching and being able to do nothing while MS gets rich over the dead bodies of smaller companies that are just trying to make a living at what they do.

MS stinks, their products stink and the way in which they treat the end users by marketing and selling inferior products stinks! Please give this country and the world the Technological enema that it so desperately deserves and needs and stick it to Microsoft. Though it won't even begin to make up for the way they have stuck it to countless others at least it's better then letting them get away with it unpunished.
